English

I was able to preview this game before it officially came out on Steam. It's fun and educational for little kids--teaches things like colors, letters, etc. I like that the mouse is nice and big because sometimes my daughter loses the mouse when she's trying to use the computer and it's easy for her to navigate around and click stuff. Lots of fun games to pick from good animations and sound effects.

Plus, it's not annoying like lots of other little kid games. My toddler definitely get my money's worth out of this one. He (4 yrs) would recommend.
